

Tanatos Studio

Overview:

Our team is known as a web professional designer ,so we decided to develop a full website to our dear client \ Abo Taleb Khaled who requested a page from which people can search on his company “Tanatos Studio” and viewing their projects at last having the ability to hire any member from the company depending on products of every one.

Abo Taleb started his company soon and he is still employing new members, so he ordered us to develop only the base design of the website with fictional projects and employees then he could edit each part easily depending on what his company would collect later.

Requirements:

What developers need ?

After collecting the details of his website we started thinking which we may use to achieve it and we thought that following programing is necessary to finish its front-end design depending on what we learnt into our study :

HTML , CSS , JavaScript , jQuery , BootStrap

We need an editor to applying these languages on like “Brackets Editor” or “Komodo Editor”.

Finally a browser from which we can run our project on as “Google Chrome” or “Fire Fox”.

When being finished we need a server to upload our project on so other users can search and open the website on their own devices it can be paid or free like “000webhostapp”.

What visitors need ?

As a visitor to the website I'll need to see a special view from which I can understand each part of the page arranged gradually as the following :

- Cover of Company.
- Applications Which Company Support.
- Ability to Connect Company Services Using my Personal E-mail.
- Sample of Works Which Employees Already Developed.
- Opinions from Previous Clients about the Services at this Company.
- Team or List of Members Who I Can Hire if Needed.
- Footer by More Details on the Company.

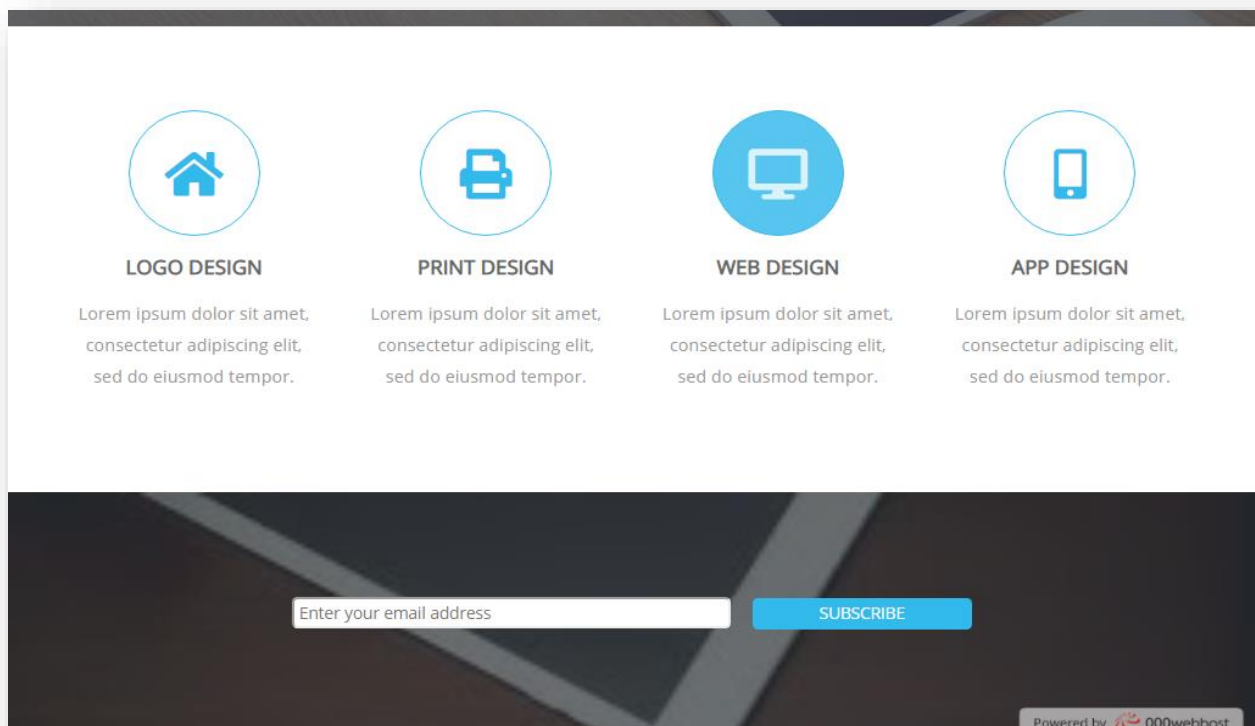

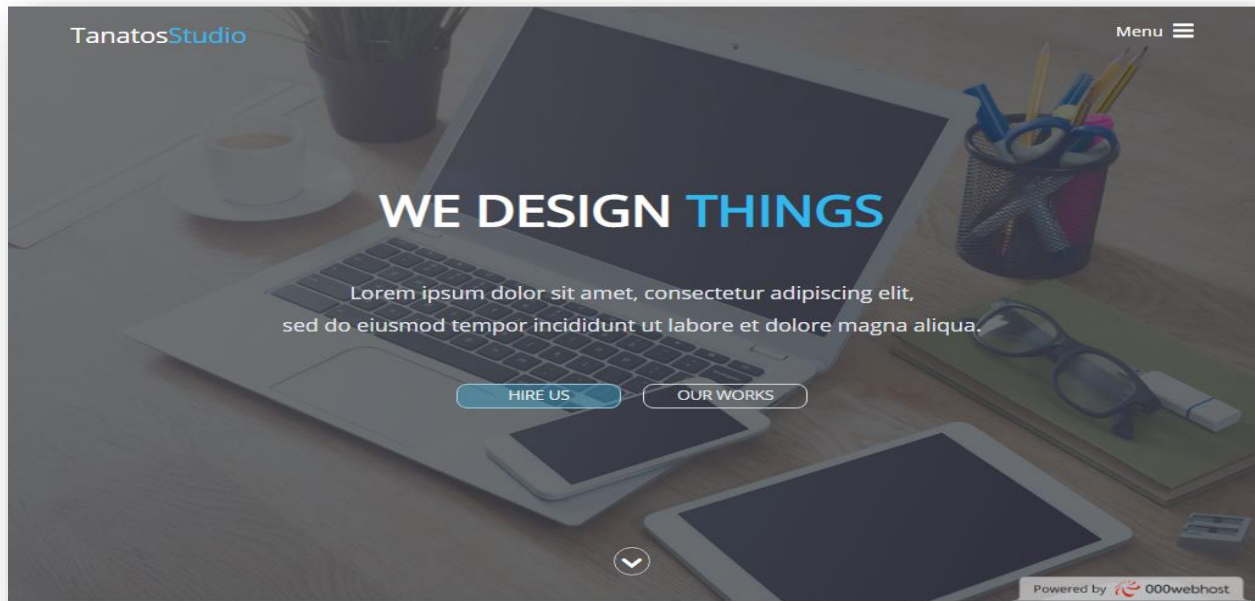

What manager need?

Of course manager of the company must have more power than employees or clients as he can change the following:

- Adding or Removing new employees from any team hired in the company.
- Accept or Refuse projects uploaded to the website which can be a header to any visitor.
- Change any part from the website elements using his own password.

Main Screen:

A suggested form to the main members of each part client requested:

About The Website:

- Basic version consists of 1500 line of code.
- Link of the page :
<https://eslamsaleh.000webhostapp.com/?fbclid=IwAR3SfhuUQJ2IEZ83Qj3YO73YZe7CC9ypEKlp3Uie3ZKEixKGSqX20zsvgko>
- Website built as a Front-End website only.
- Page doesn't include any prepared plugins as every single line was developed by our team.
- Developing the main form took 3 days, so the expected time to complete the full form may take 7 days.

Our Group:

- Eslam Saleh Mohammed Hamed 20170046 G2
- Eslam Mohammed Mahmoud Awad 20170049 G2
- Ahmed Sayed Mansour Sayed 20170022 G1
